Special aquarium provides a unique underwater view of live Amazonian fish in the "Amazon Voyages" exhibition, now at The Academy of Natural Sciences in Philadelphia.

PENNSYLVANIA Philadelphia

THE ACADEMY OF NATURAL SCIENCES *Through December 31*: "Amazon Voyage: Vicious Fishes and Other Riches." This exhibition explores native people and the biodiversity of South America's Amazon River region. Examine the teeth of the world's largest piranha (now extinct), test the zap of an electric eel, or discover Encante, the mythical, underwater world of pink dolphins.
